

Lab Certificate

Martin van Elp

has successfully completed the 14-day lab

Youth Encounter on Sustainability (YES) – “Making sustainability work”

Seewis (GR) / Switzerland, 7th February – 20th February 2016

Workload equivalent: 3 ECTS credits

www.myclimate.org/yes

René Estermann
CEO, myclimate

Maxi Grebe
Head of climate education,
myclimate

Dominik Mösching
YES program director, myclimate

Covered topics:

Part 1: Global challenges

- Analyze state of the planet in the context of COP21 Paris outcomes: climate change & energy, food & nutrition
- Discuss shifting paradigms: wellbeing & «development», systems & complexity thinking
- Connect solutions & cases across different sectors & action levels: Sustainable projects, businesses, cities, societies

Part 2: Local solutions

- Contribute to sustainability onsite: Craft sustainable regional, business, destination models for Seewis & Graubünden area
- Assess impacts within and across system boundaries, deal with social dynamics & frictions

Part 3: Action

- Design & pitch smart value propositions and applicable projects, present-reflect-specify own ideas
- Reflect your personal and career paths in individual coachings
- Bring your own project: develop & assess it with peers & experts, receive feedback & know-how for next steps, realize it after YES
- Expand your network to advance your personal, academic & professional development

Nadja Kunz	International Finance Cooperation, Water consultant, specialist.

About YES

myclimate offers with **Youth Encounter on Sustainability (YES)** unique hands-on learning experiences for students and young professionals from all fields and countries. YES is dedicated to build global partnerships of change agents and institutions, and to leave a local impact behind.

Making sustainability work: In **intensive 2-week trainings**, students, graduates and experts develop creative answers to **sustainability challenges** on-site. The challenges are pitched by local YES partners (universities, companies, organizations). **25-35 participants** get together, craft solutions and propose projects in a transdisciplinary, transcultural, practice-oriented and lab-like setting. The program is conducted in English. 2-4 YES labs are held each year in changing international locations.

To whom it may concern:

The following information is information regarding a Youth Encounter on Sustainability (YES) lab offered by myclimate. Many institutions award credits to their students that participate at YES labs. This information is provided to estimate the number of credits that this lab would have in your institution, since the manner in which they are calculated varies from one institution to another. Each participant who wishes to opt for credits in his/her institution must complete all group work and participate actively in the entire lab. You may request additional information about the contents of the lab and the instructors at the following e-mail address: yes@myclimate.org

Lab Code:	YES CH 2016
LAB COMPONENT IN NUMBER OF HOURS	
Classroom theory:	30
Practical work (classroom):	26
Extra class study:	20
Field practice:	17
TOTAL HOURS:	93
